

Client **journey**

VAT IT Reclaim, the global leader in reclaiming foreign and domestic VAT, provides top-notch services to over 13,000 clients worldwide. Through our partnership with Bezala, we offer a seamless integration that enables you to reclaim VAT effortlessly for all your receipts and invoices stored in Bezala.

HOW IT WORKS

- The client activates and approves the VAT IT Reclaim service in the Bezala marketplace.
- The client authorizes the transfer of data from Bezala to VAT IT.
- VAT IT audits your expenses and prepares the necessary documentation to reclaim VAT in each required market.
- An account manager from VAT IT will contact the client to discuss the audit and request signatures on the relevant documentation.
- VAT IT submits the claims, and once the refund is received, the client gets paid (minus the VAT IT fee).

Tech when it counts. **Human** where it matters.

SERVICES

FOREIGN VAT:

VAT IT handles and processes the VAT claims, submitting them to the relevant VAT Authorities on behalf of the client. When the Tax Office refunds the VAT, it goes directly to VAT IT.

VAT IT deducts a percentage as their fee before forwarding the remaining amount to the client. The client is given a breakdown of the claims and fees at every refund payment.

DOMESTIC VAT:

VAT IT prepares a schedule for the client, following the legal requirements of each territory, to ensure the clients complies with local VAT regulations. The client will include the schedule in their your local VAT returns.

VAT IT charges a percentage fee based on the claimable expenses included in the VAT schedule. This is invoiced by VAT IT quarterly.
